PROFILE

Dynamic IT leader with 27 years of experience guiding distributed teams, complex infrastructure programs, and people-centered service operations. Currently leading Field Service for Trilon Group's North Region, aligning onsite support, endpoint readiness, service quality, and employee technology experience across regional offices. Known for calm leadership under pressure, practical process standardization, and a mentorship style built on trust, accountability, and measurable improvement.

PROFESSIONAL EXPERIENCE

Field Service Manager, North Region

Trilon Group | North Region

Jan 2026 - Present

- Lead, coach, and mentor a regional team of Field Support Engineers while fostering accountability, inclusion, continuous learning, and balanced coverage across supported offices.
- Oversee daily field operations including onboarding, offboarding, hardware lifecycle management, office technology readiness, ticket prioritization, escalations, and SLA compliance.
- Standardize hardware procurement, configuration, refresh procedures, documentation, knowledge-base practices, and service delivery playbooks to improve consistency and resolution speed.
- Partner with enterprise Helpdesk, Infrastructure, Engineering, and IT leadership teams on major incidents, partner integrations, office transitions, pilot programs, and service delivery improvements.
- Drive employee technology enablement through Microsoft 365, Teams, SharePoint, endpoint readiness, user feedback, local training, and proactive digital workplace adoption.

IT Manager

Fehr Graham Engineering & Environmental | Freeport, Illinois

2007 - Present

- Orchestrated mergers, acquisitions, and office relocations across 11 locations while preserving uptime and meeting compliance requirements ahead of mandate dates.
- Executed infrastructure upgrades including VMware migrations, firewall hardening, WAN improvements, and server modernization to strengthen disaster recovery and application performance.
- Mentored IT professionals through strength-based assignments, collaborative growth plans, cross-training, and practical coaching that improved retention and team performance.
- Implemented service metrics, SLA practices, helpdesk transition improvements, vendor coordination, and standardized processes that improved stakeholder confidence across multi-site operations.
- Applied hands-on technical leadership across networking, endpoint security, backup validation, cloud integrations, software deployment, and full-stack server OS management.

Information Systems Analyst (74B)

United States Military

2001 - 2009

- Helped lead a distributed team of 24 personnel in high-pressure environments, maintaining secure communications and mission-critical connectivity.
- Built resilience and operational readiness through clear directives, mentorship, drills, adaptive feedback, and calm decision-making under pressure.
- Strengthened team trust by combining military discipline with empathy, vulnerability, and consistent follow-through.
